

EUROPEAN UNION

DELEGATION TO BOSNIA AND HERZEGOVINA

Clarification No. 1

Project Title: Development of Infrastructure of Metrology system in BiH

Publication reference: [EuropeAid/130697/C/SUP/BA](#)

Tender No: EC/BiH/10/040

Question 1: Lot 1

Instruction to tenderers – Article 4. Origin

Article requires:

Unless otherwise provided in the Special Conditions, supplies must originate in a Member State of the European Community or a country covered by the IPA programme with the exception of the following items for which derogation is granted: **Lot 1 – Items: 2, 4, 5, 6**; Lot 2 – Items: 1, 8, 9 and 11. The origin of the goods must be determined according to the Community Customs Code or the international agreements to which the country concerned is a signatory.

The question is: Lot 1 consists of 5 items only so we assume there is a typing mistake. Can you please clarify which items in Lot 1 can originate in non-European countries?

Answer 1:

Please read Corrigendum No: 1.

Question 2: Lot 4

From the specifications that have been included in the tender for Lot 4 – Calibration Equipment for Pressure, it is clear that after consultation with manufacturers that no product produced within the EC will meet these requirements.

Please confirm if derogation will be granted to allow non-EC products to be offered and therefore equipment that will match the stipulated requirements.

It has been noted that derogation has already been given for other items in this tender procedure.

Answer 2:

We believe that, based on our market research, the origin requirements can be met for this lot.
