

EUROPEAN UNION

Delegation to Bosnia and Herzegovina

Sarajevo, 23rd November 2012

Clarification No. 1

Rehabilitation of the Fortress Kastel, Banja Luka EuropeAid/133-573/L/WKS/BA

Tender No. EC/BiH/12/003

Question 1:

As part of the professional portion of the qualification, the Contracting Authority requires the evidencing of an authorization certificate of professional qualification for specified persons (Project Manager – Chief Site Manager, Site Manager for Technologies – Electrical and Mechanical Engineer). Will the Contracting Authority also recognise as sufficiently conclusive the evidencing of such requirements through the submission of a certificate of professional qualification issued in one of the member states of the European Union (Czech Republic)?

Answer 1:

It is not quite clear to which "authorisation certificate" you are referring to. If you are referring to the requirement for the Key personnel to be chartered engineers; it is clearly stated that this should be according to the legislation applicable in Bosnia and Herzegovina

Question 2:

As part of the professional portion of the qualification, the Contracting Authority requires the evidencing of a person as a "Site Manager for Technologies – Electrical and Mechanical Engineer". For the avoidance of doubt, we request a definite specification of whether the Contracting Authority requires one person (Electrical and Mechanical Engineer) or whether the Contracting Authority requires two persons i.e. one person as an "Electrical Engineer" and another person as a "Mechanical Engineer"?

Answer 2:

According to the Selection criteria, namely Professional capacity criteria, listed in the Works procurement Notice (Article 16) and Instructions to Tenderers (Article 12), the Key personnel will consist of three persons:

- a) Project/Site Manager
- b) Heating/Ventilation/Air-Conditioning Engineer
- c) Electrical Engineer

Question 3:

The Contracting Authority requires the evidencing of three successfully executed and completed construction contracts in the area of reconstruction of historically valuable buildings. Does the Contracting Authority truly require no minimum financial value for each of the evidenced reference contracts?

Answer 3:

Yes, there is no minimum financial value of executed and completed projects specified as part of the Technical capacity criterion.
