

EUROPEAN UNION

Delegation of the European Commission to Bosnia and Herzegovina

Sarajevo, June 2014

Clarification No 1 to Tender Dossier

The reconstruction of the Kastel Fortress phase II – unit 2 “cultural Centre with auxiliary services” EC/BiH/TEN/14/007; EuropeAid/135-952/DD/WKS/BA

Question 1

In works Contract Notice, Item 16. Selection Criteria – Professional capacity and in Volume 1, Section 1 Instructions to Tenderers, Item 12.2 – Professional Capacity for the above mentioned Tender we have read that the Site Manager must meet some requirements.

We were wondering if a Site Manager having the required experience, having a University degree in Civil Engineering or Architecture and having the professional accreditation that we think is equivalent in Spain to a chartered engineer according to the legislation applicable in Bosnia and Herzegovina will be accurate as key personnel for this work.

Answer 1:

As mentioned in the tender documents the site manager must be a chartered engineer according to the legislation applicable in BiH and the relevant certificate must be included in the offer.

Chartered engineer according to BiH legislation is the engineer authorised for performing tasks related to construction (i.e. supervision, site management and organisation etc.).

The EU Delegation to Bosnia and Herzegovina is not in a position to advise you on the certification procedures. For detailed information please be kindly advised to contact the RS Ministry of Spatial Planning, Civil Engineering and Ecology, on the following address:

Trg Republike Srpske 1,
78000 Banja Luka
