CLARIFICATION NO 2 TO TENDER DOSSIER

Improve Technical Working Conditions of Court Police, Bosnia and Herzegovina

Publication reference: EuropeAid/136617/DH/SUP/BA; EU/BiH/TEN/15/001

GENERAL QUESTIONS FOR ALL LOTS

QUESTION no. 1

In tenders is written: „All tenders submitted must comply with the requirements in the tender dossier and comprise: Part 1: Technical offer, Part 2: Financial offer and Part 3: Documentation".

We are interested if all three parts must be bound together, stamped, sealed and initialled or each part separately bound stamped, initialled and packed?

ANSWER no. 1

All three parts can be binded together with the rest of the documentation that will represent your offer. You are required to sign and stamp only certain documents where it is specifically requested in the particular form. You do not have to initial documents. Tenders must be submitted in one original, marked 'original', and 3 (three) copies signed in the same way as the original and marked 'copy'.

QUESTION no. 2

Regarding the tender guarantee, please advise us in what way shall be submitted with the bid and whether it must be in English language?

ANSWER no. 2

Please refer to Article 22 of Instruction to Tenderers. The tender guarantee shall be submitted in English language using Tender Guarantee Form which is included in the Tender Dossier, Draft contract and special conditions, Annex V.

QUESTION no. 3

Regarding the origin of goods, does the individual items offered may have originated from Bosnia and Herzegovina and some from the EU or other countries of the region? Does form can satisfy Declaration/ Statement of producer?

ANSWER no. 3

Individual items can origin from any country eligible according to the IPA regulation mentioned in Article 22 of the Supply Contract Notice.

When submitting tenders, tenderers must state expressly (in free-format) that all the goods meet the requirements concerning origin and must state the countries of origin. If necessary, the tenderer may be asked to provide additional information in this regard. The certificates of origin must be submitted at the latest during implementation of the contract. Certificate of origin must be issued by the competent authorities of the goods' or supplier's country of origin (usually the Chamber of Commerce) and comply with the international agreements to which that country is a signatory.

EUROPEAN UNION

Delegation of the European Commission to Bosnia and Herzegovina

QUESTION no. 4

Regarding the Technical Specifications for Lot 2, whether bidders must fill in columns Specifications Offered and Notes, remarks, ref to documentation?

ANSWER no. 4

Yes. Column 4 is to be filled in by the tenderer and must detail what is offered (for example the words "compliant" or "yes" are not sufficient), and Column 5 allows the tenderer to make comments on its proposed supply and to make eventual references to the documentation. This is applicable for all Lots.

QUESTION no. 5

Do bidders need to submit with offer samples or certificate for the offered equipment from Lot 2?

ANSWER no. 5

Samples are not requested. When submitting bid for Lot 2 (and any other lots), the bidder shall submit a certificate of quality for those items where it is specifically requested in Annex II+III.

EUROPEAN UNION

Delegation of the European Commission to Bosnia and Herzegovina

QUESTIONS FOR LOT 1

Item no. 1.1

QUESTION no. 1

In relation to the requirement for “radio CD or MP3 CD with 4 speakers (factory installed)”, please confirm, that is acceptable to be offered next generation car sound system - SWING system with USB port and SD card.

ANSWER no. 1

The technical specification has been modified. Please see Corrigendum no. 2 to TD.

QUESTION no. 2

In relation to the requirement for “Installation of UHF radio station including: Frequency range 136-174 MHz”, please confirm that is required radio station in frequency range 136-174MHz, which is VHF.

ANSWER no. 2

The technical specification has been modified. Please see Corrigendum no. 2 to TD.

QUESTION no. 3

Installation of lighting and acoustic signals including. Please confirm that will be accepted also a fixed roof mounting. Magnetic mounted system in certain weather conditions, could be easily damaged.

ANSWER no. 3

Fixed roof mounting is not acceptable.

QUESTION no. 4

The technical specifications calls for magnetic lighting and acoustic signals. Kindly confirm if magnetic type lighting (mounted on the roof) with acoustic signals (installed in the engine compartment) are acceptable. Please understand that above configuration reflects the current EC standards.

ANSWER no. 4

Magnetic type lighting (mounted on the roof) with acoustic signals (installed in the engine compartment) are acceptable.

Item no. 1.2

QUESTION no. 5

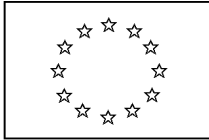

In the technical specification is only stated “intercom for listening and to communicating with a person in cage”. There is no information what type of cage and where it should be placed – whether behind the first and second row of seats, or behind the second row of seats.

ANSWER no. 5

„Cage“ means the compartment for transport of persons placed behind the second row of seats. Intercom (microphone-speaker) should be placed inside the cage.

QUESTION no. 6

Please clarify whether it will be acceptable, cage to be done by dividing wall between passengers and cargo area.

ANSWER no. 6

Yes, it is acceptable. *Please see Corrigendum no 2 to TD.*

QUESTION no. 7

To enable tenderers to complete their offer, it is essential to receive as many specifications as possible on the compartment for the transport of detained persons (cage), such as: internal layout, access doors, materials, seating capacity, safety requirements etc. Please understand that it will not be possible to prepare an offer in the absence of these important specifications.

ANSWER no. 7

The "cage" is not a part of the delivery and below detailed description is provided just to describe the inner space of the van in order to provide additional information in support to better preparation of the offer of the upgrades (mini surveillance camera, intercom and fan)

- *A slide (security) door for accessing/closing the cage should be placed just after the double rear doors and before the benches inside the compartment for transport of persons (the cage). The slide door must be made of strong metal with small openings for ventilation on the upper side of the door (maximum dimension of openings 20x20 mm) with a door lock unreachable to a detainee.*
- *The compartment for transport of persons should have two side benches (app. dimensions 900x400mm) with the back rest. Bench with the back rest should be made of firm foam, coated with material easy to clean and have reinforced mounting. Next to the bench there should be a metal ring for attaching the restraints (handcuffs). The edge of the bench on the sliding side of the security slide door should be cut under 45° angle for easier entering.*
- *The top layer of the floor of the compartment for transport of persons should have stainless, non - slip metal sheet with water drain.*
- *All parts and panels of the compartment for transport of persons made of soft breakable materials (plywood and similar) must be replaced with stainless metal sheets.*

QUESTION no. 8

The technical specifications call for two rows (driver and front passenger, and 3 back seats). The technical specifications also mention a compartment for the transport of detained persons (cage).

Kindly confirm if the 3 back seats (second row) must be fitted inside the compartment for transport of detained persons (i.e. inside the cage).

Please also confirm if the access to the compartment for the transport of detained persons (cage), must be through the right side sliding door.

Please also specify whether an additional (internal) access door, must be envisaged for guaranteeing the necessary security conditions.

ANSWER no. 8

The "cage" is not a part of the delivery and below description is provided just to better describe the inner space of the van.

The three back seats (second row) must be fitted inside the passengers' part of the vehicle since it will be used for transport of police officers.

The access to the compartment for the transport of detained persons (cage) must not be thought the side sliding door but through the double back door. The side sliding door is entrance for the second row of seats in the passengers' part of the vehicle.

There should be no additional internal access door.

QUESTION no. 9

EUROPEAN UNION

Delegation of the European Commission to Bosnia and Herzegovina

The technical specifications calls for lighting and acoustic signals mounted on the roof. Kindly confirm if the lighting (mounted on the roof) with acoustic signals (installed in the engine compartment) are acceptable. Please understand that above configuration reflects the current EC standards.

ANSWER no. 9

Magnetic type lighting (mounted on the roof) with acoustic signals (installed in the engine compartment) are acceptable.

QUESTION no. 10

The technical specifications call for a vehicle Length of minimum 4880 mm. However, please note that vehicles within the required power range have an overall length ranging from 4700 to 5000 mm. We kindly ask for a reasonable tolerance of the overall vehicle's length.

ANSWER no. 10

The technical specification has been modified. Please see Corrigendum no. 2 to TD.

Item 1.3

QUESTION no. 11

It is required "double rear doors with no windows - sheet metal, side windows of cargo area closed with sheet metal" and in the same time there is a requirement for "security reflective film (glass on the side sliding door and double rear door, lateral parts of cargo area". Please clarify whether is acceptable to be offered a vehicle 1+4 seats with secured windows by metal net and security reflective film on rear doors and side windows of the cargo area.

ANSWER no. 11

The technical specification has been modified. Please see Corrigendum no. 2 to TD.

QUESTION no. 12

Would it be acceptable for the cargo area to be with following dimensions: width of 1200 mm (+/-5%), length of 800 mm (+/-5%), height of 1000 mm (+/-5%). Please note, that these are minor deviations, which will boost competitiveness and will encourage the open and transparent procurement of the above mentioned tender procedure.

ANSWER no. 12

The technical specification has been modified. Please see Corrigendum no. 2 to TD.

QUESTION no. 13

Please confirm if rear doors and side windows of cargo area are from metal sheet, security reflective film is not required.

ANSWER no. 13

The technical specification has been modified. Please see Corrigendum no 2 to TD.

QUESTION no. 14

To enable tenderers to complete their offer, it is essential to receive as many specifications as possible on the compartment for the transport of detained persons (cage), such as: internal layout, access doors, materials, seating capacity, safety requirements etc. Please understand that it will not be possible to prepare an offer in the absence of these important specifications.

ANSWER no. 14

The "cage" is not a part of the delivery and below detailed description is provided just to describe the inner space of the van in order to provide additional information in support to better preparation of the offer of the upgrades (radio station, intercom and fan):

- *A security door for accessing/closing the cage should be placed just after the double rear doors and before the benches inside the compartment for transport of persons (the cage). The door must be made of strong metal with small openings for ventilation on the upper side of the door (maximum dimension of openings 20x20*

mm) and bottom of the door closed with metal sheet, with a door lock unreachable to a detainee.

- *The compartment for transport of persons (cage) should have two side benches (dimensions 600x300mm) with back rest. Benches with the back rest should be made of firm foam, coated with material easy to clean and have reinforced mounting. Next to the bench there should be a metal ring for attaching the restraints (handcuffs).*
- *The floor of the compartment for transport of persons should have stainless, non-slip metal sheet with water drain.*
- *All parts and panels of the compartment for transport of persons made of soft breakable materials (plywood and similar) must be replaced with stainless metal sheets.*

QUESTION no. 15

The technical specifications call for two rows (driver and front passenger, and 3 back seats). The technical specifications also mention a compartment for the transport of detained persons (cage).

Kindly confirm if the 3 back seats (second row) must be fitted inside the compartment for transport of detained persons (i.e. inside the cage).

Please also confirm if the access to the compartment for the transport of detained persons (cage), must be through the right side sliding door.

Please also specify whether an additional (internal) access door, must be envisaged for guaranteeing the necessary security conditions.

ANSWER no. 15

The "cage" is not a part of the delivery and below detailed description is provided just to describe the inner space of the van in order to provide additional information in support to better preparation of the offer of the upgrades:

The three back seats (second row) must be fitted inside the passengers' part of the vehicle since it will be used for transport of police officers.

The access to the compartment for the transport of detained persons (cage) must not be thought the side sliding door but through the double back door. The side sliding door is entrance for the second row of seats in the passengers' part of the vehicle.

There should be no additional internal access door.

QUESTION no. 16

As far as the cargo area (volume of the trunk) is concerned, the technical specifications states that the "minimum length of the cargo area/trunk means the length between the partition fixed behind the second row seating and sliding doors built in the cargo area". However: please note that these vehicles cannot have any "sliding doors" behind the cargo area/trunk. Kindly confirm that the "sliding doors" referred to in the technical specifications, must read "double rear door".

EUROPEAN UNION

Delegation of the European Commission to Bosnia and Herzegovina

ANSWER no. 16

The technical specification has been modified. Please see Corrigendum no. 2 to TD.

QUESTION no. 17

Please also note that these vehicles can be equipped with sliding door on the second row, but not on front passenger's side.

ANSWER no. 17

The technical specification has been modified. Please see Corrigendum no. 2 to TD.

QUESTION no. 18

The technical specifications calls for "Police marks (insignias) on the vehicle in accordance with the Rules on Police Insignias of the Court Police of Republika Srpska available on the web site of the Court Police of Republika Srpska". Kindly confirm the website where tenderers may get the necessary information on the required Police Insignias. As an alternative, kindly provide additional details on this requirement.

ANSWER no. 18

Details on police marks (insignias) can be found on the link:

http://sudskapolicijars.com/pravilnik_o_oznakama_sudske_policije_rs

details begin in Article 7 of the Book of Rules.

QUESTION no. 19

The technical specifications calls for lighting and acoustic signals mounted on the roof. Kindly confirm if the lighting (mounted on the roof) with acoustic signals (installed in the engine compartment) are acceptable. Please understand that above configuration reflects the current EC standards.

ANSWER no. 19

Magnetic type lighting (mounted on the roof) with acoustic signals (installed in the engine compartment) are acceptable.

QUESTIONS FOR LOT 2

QUESTION no. 1

2.6 Bullet-proof vest

Should bullet - proof vest be for the under wearing or a vest that should have a pocket for further panel adding?

ANSWER no. 1

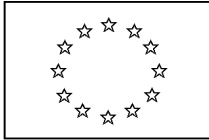

The bullet-proof vest will not be the under wearing (will not be worn under clothing) and it should have pockets in front and in the back for panel adding that increases protection.

QUESTION no. 2

What are the measurement of panels?

ANSWER no. 2

The technical specification has been modified. *Please see Corrigendum no. 2 to TD.*

EUROPEAN UNION

Delegation of the European Commission to Bosnia and Herzegovina

QUESTIONS FOR LOT 4

QUESTION no. 1

Due to the size of the project, we do not intend to participate to the site visit in Tuzla. However, the requirements emphasized that "for installation purposes, a contractor is obliged to provide power supply cables, connectors, plastic channels, AC adapters, fuse boxes, and all other materials needed for system installation".

We therefore kindly ask you to provide all necessary data concerning cable type (CAT5, CAT6, CAT7), cable length, plastic cable channel size and length, etc. All information suitable for proper installation by contractor shall be provided by the Contracting Authority and part of the technical requirements.

ANSWER no. 1

Please see Corrigendum no. 1 to TD.

QUESTION no. 2

Item 4.4: It is requested a PTZ control joystick. What is the meaning of the "mount kit included"? We kindly ask you to remove this specification from the technical specifications.

ANSWER no. 2

The technical specification has been modified. Please see Corrigendum no. 2 to TD.

QUESTION no. 3

You request 32" LED TVs. There is no manufacturer in eligible countries which will provide a certificate of origin for such quantity and this size. We kindly ask you to derogate the rules of origin for the TVs.

ANSWER no. 3

The conducted market research resulted in finding manufacturers of this product in the IPA eligible countries therefore, derogation is not granted.

QUESTION no. 4

Item 4.14. We kindly ask you to remove the following specifications:

"designed to enable opening of the case, change of optical devices, hard disk drive without use of tools". We do not believe that the end-user intends to change once a day, nor once a year... the HDD, orto open the case.

"keyboard should be from the same brand than manufacturer of workstations¹¹. Some eligible manufacturers do not sales in BiH and do not provide BiH layout keyboard. These keyboard can be purchased in BiH separately.

"mouse should be from the same brand than manufacturer of workstations".

ANSWER no. 4

The technical specification has been modified. Please see Corrigendum no 2 to TD.

EUROPEAN UNION

Delegation of the European Commission to Bosnia and Herzegovina

QUESTIONS FOR LOT 5

QUESTION no. 1

Please refer to remarks point in question no. 4 for Lot 4.

In addition, there is no manufacturer of copy machine within the eligible countries. Please derogate this item from rules of origin.

ANSWER no. 1

*Regarding first part of the question: The technical specification has been modified. Please see **Corrigendum no 2 to TD**.*

The conducted market research resulted in finding manufacturers of this product in the IPA eligible countries, therefore, derogation is not granted.

QUESTION no. 2

Item 5.2: Copy Machine

You are asking for resolution: 1200 x 1200 dpi. Please note that the standard print resolution for **A3 B&W is 600 x 600 dpi** and the printer resolution for **A3 Color is 1200 x 1200 dpi**.

Since you are asking for B&W photocopier the resolution must be 600 x 600 dpi otherwise we have to offer coloured photocopier to get a print resolution 1200 x 1200 dpi. Please advise.

ANSWER no. 2

Resolution of 1200x1200 dpi stated in the technical specification for the Copy Machine refers to Copy Machine print resolution. Scan resolution can be lower (600x600 dpi), as it was not specified in the technical specification.

QUESTION no. 3

Monochrome printer should with a finisher, by "tray with a minimum output capacity of 1000 sheets A4" do you mean that the finisher itself should have a stacking capacity minimum of 1000 sheets or do you mean that the printer should come with a paper feed cabinet with a minimum of 1000 sheets capacity?

ANSWER no. 3

Finisher tray output capacity needs to be at least 1000 sheets. Since the specification refers to Copy machine, Finisher must have at least one output tray that can support 1000 output sheets.

QUESTION no. 4

The requirements for the printer request to have a "warm up time from stand by of 12s". However most of the manufacturers specify that the warm-up time is the time required to start printing when both main power and sub-power switches are turned from OFF to ON. In addition the warm-up time depends of environmental conditions and usage. Therefore The warm-up time is just an indicative time as it may vary a lot. In order to open the competition, we kindly request that this requirement is drafted as follow: "warm-up time from turn ON main power switches should not exceed 25s.

ANSWER no. 4

Copy machine will be used in a way that it will not be turned off and then back on for every print or copy job. It will be powered on all the time, kept in standby when not in use, so the warm up time from stand by is very important, and it needs to be as short as possible. Therefore this requirement cannot be changed.

EUROPEAN UNION

Delegation of the European Commission to Bosnia and Herzegovina

QUESTION no. 5

OCR-MRZ reader should be a complete document processing (ICAO MRZ, General VIZ, RFID). What does exactly General VIZ refer to? The reader generally comes with a user-configurable VIZ OCR tool, that is used to read data fields from the VIZ of the documents. Did you mean this?

ANSWER no. 5

General VIZ refers to General Visual Inspection Zones for documents that do not conform to ICAO MRZ standard.

QUESTION no. 6

Should the OCR-MRZ reader be capable to read VIZ? If yes note that MRZ and VIZ comparison and other cross verifications are due by end user's system integrators software. Software can only perform B900 1R ink check and UV dullness/paper check.

ANSWER no. 6

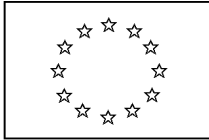

Yes. Document reader must be capable to read VIZ.

QUESTION no. 7

Should the OCR-MRZ be capable to read contact chip and magnetic stripe and non-MRZ (non ICAO) data fields?

ANSWER no. 7

OCR MRZ should be able to read RFID personal ID documents, not contact chips of magnetic stripes.

EUROPEAN UNION

Delegation of the European Commission to Bosnia and Herzegovina

QUESTIONS FOR LOT 6

QUESTION no. 1

Item no. 6.1

Under digital handset it is stated earpiece, two wired with spiral and acoustic speaker. Is it possible to offer earpiece that has one wire to PTT/microphone and the other from PTT/microphone to spiral acoustic earpiece?

ANSWER no. 1

No, it needs to have two separate wires, one for microphone and the other for earpiece/speaker.

QUESTION no. 2

In the technical specification for LOT6, (page 37 of 39), Item number 6.1, it's stated Digital handset UHF 403-470 MHz / VHF 136-174 MHz. Would you please be so kind to elaborate are the digital handset for UHF or VHF frequency range?

ANSWER no. 2

Digital handset must be able to cover both UHF and VHF stated frequency range.

QUESTION no. 3

In the technical specification for LOT6, (page 37 of 39), Item number 6.2, it's stated Digital base station UHF 403-470 MHz / VHF 136-174 MHz. Would you please be so kind to elaborate is the digital base station for UHF or VHF frequency range?

ANSWER no. 3

Digital base station must be able to cover both UHF and VHF stated frequency range.

QUESTION no. 4

In the technical specification for LOT6, (page 37 of 39), Item number 6.2, it's stated Digital base station UHF 403-470 MHz / VHF 136-174 MHz. Would you please be so kind to elaborate do we only count one repeater with mentioned technical characteristics or additional equipment needs to be included such as:

- Antenna (if yes what characteristic)
- Antenna cable and connectors (If yes what characteristic and how many meters)
- Duplexer (if yes what characteristic)
- Rack for repeater (if yes what characteristic)
- Surge protection (if yes what characteristic)
- Backup power-battery (If yes what characteristic)
- Isolation transformer (If yes what characteristic)
- Installation on site services
- Measurements and radiation study

ANSWER no. 4

No other services/equipment are required.

QUESTION no. 5

In the Annex IV-Budget breakdown, it's stated under Column D price in EUR (DDP6) and under explanation it's price without customs duties, import duties, relevant fiscal charges. Would you please be so kind to elaborate what price to put in this column, price without customs of with?

ANSWER no. 5

Price without custom duties, import duties, taxes or other equivalent fiscal charge.

EUROPEAN UNION

Delegation of the European Commission to Bosnia and Herzegovina

QUESTIONS FOR LOT 7

QUESTION no. 1

FORTRESS does not provide any data on the compatibility between camera manufacturers and their software. The compatibility list shall be provided by the Contracting Authority to avoid discrimination.

ANSWER no. 1

The beneficiary only has end user licenses for Eccos Fortress Software, not source code, and are, therefore, unable to provide list of compatible cameras.

QUESTION no. 2

The requirement "minimum speed of vehicles identified of 100 km/h" Is a software requirement and not a requirement which belongs to the camera. Please remove.

ANSWER no. 2

This must not be removed. It is not software requirement as it requires very fast camera shutter speeds, sharp picture sensor and hardware image processing abilities in the camera.

QUESTION no. 3

These ANPR camera should be connected to a video server/NVR.... Will the recording system support third party cameras?

ANSWER no. 3

There is no NVR server nor any recording of video. License plate recognition is provided by aforementioned Eccos Fortress License plate recognition server.

QUESTION no. 4

Please specify what you mean by "Rotation up to 30e after installation". We do not understand this specification nor its meaning.

ANSWER no. 4

Rotation of up to 30 degrees after installation means that the camera must be able to be adjusted along horizontal and vertical axis of up to 30 degrees, after installation, without requiring major construction work. It is intended for finer adjustments of direction while in use.

QUESTION no. 5

There no rules of eligibility for CCTV cameras lot 4. Is eligibility rule apply for these cameras?

ANSWER no. 5

For cameras in Lot 4 the eligibility rule does not apply as derogation of rules of origin is granted, see Article 8 of Supply Contract Notice. For cameras in Lot 7 the eligibility rule applies.

QUESTION no. 6

The metal detector should have external dimensions WxDxH comprises 550-850mm x 240- 650mm x 550-850mm. However these equipment are regulated by international standards which refer to the interior portal which say that:

"Mechanical Specifications and requirements:

Dimensions and weight:

The detector shall be designed so the interior of the portal through which people will walk has the following dimensions:

a) Height minimum: 195 cm (78 in)

EUROPEAN UNION

Delegation of the European Commission to Bosnia and Herzegovina

b) Width minimum: 71 cm (28 in) unless required to comply with that specified by the Disabilities Local regulations

c) Depth minimum: 91 cm (36 in)"

To open a fair competition, we kindly ask you to refer to the interior portal by requesting dimensions WxDxH 2 71x91x195 cm.

ANSWER no. 6

Description of the metal detector door foresees the following external dimensions:

- width 550-850 mm
- height 2200-2300 mm
- depth 240-650 mm.

Conducted market research resulted in finding that the manufacturers of metal detector doors give external dimension as one of the parameters, therefore the technical specification has not been modified.

QUESTION no. 7

In the technical specification for LOT 7, (page 38 of 39), Item number 7.1, it's stated that the offered Plate number recognition camera has to be compatible with your existing FORTRESS software for plate number recognition. Would you please be so kind to elaborate following questions:

- Which protocol is used for communication between ANPR Camera and Fortress software?
- What are the requirements for ANPR Camera output and what is necessary Co be for Fortress software input, JPEG image, MetaData, TXT string?
- What kind of communication is used between ANPR camera and Fortress Software, UTP Cable, Optics, Wireless, GPRS?

ANSWER no. 7

- *HTTP for accessing built-in HTTP control server, RSTP for live view and UDP for MJPEG/H264 streams*
- *Camera output is mjpeg stream, but it's also possible to use TXT string if camera has built-in LPR server and OCR software. .*
- *UTP cable*

QUESTION no. 8

In the technical specification for LOT 7, (page 38 of 39), Item number 7.2, it s stated that the external dimensions of the metal detector doors have to be: 550-850 mm (wide), 2200-2300 mm (high) and 240-650 mm (long). Would you please be so kind to elaborate following question:

Will you accept following dimension of our metal detector doors: Passageway Interior Size: 760 mm (wide), 2030 mm (high) and 580 mm (long); Overall Exterior Size: 900 mm (wide), 2210 mm (high) and 580 mm (long)?

ANSWER no. 8

- *Description of the metal detector door foresees the following external dimensions:width 550-850 mm*
- *height 2200-2300 mm*
- *depth 240-650 mm*

Therefore, the metal detector door of 900 mm width will not be accepted.

Dimitrios Kalogeras

Head of Contracts, Finance and Audit Section
