OBRAZLOZENJE PROJEKTA

1. SOCIOEKONOMSKI UTICAJ

Predmetna lokacija je većim dijelom privatno poljoprivredno zemljište u vlasništvu povratnika iz sela Makotići, dok je manji dio državno zemljište obraslo crnogoričnom šumom. Udaljeno je od najbližih kuća sela Makotići oko 120 metara. U prijeratnom periodu zemljište je korišteno za ispašu stoke, sječu šume, branje gljiva i lov. Zbog minske opasnosti zemljište se ne koristi ni u kakve svrhe, a povratnici u neposrednom okruženju sijeku šumu, napasaju stoku, privode namjeni poljoprivredno zemljište, bave se lovom i svojim aktivnostima dovode se u opasnost od mina. Tehničkim izviđanjem predmetne lokacije redukovala bi se sumnjiva površina, zemljište privelo namjeni, čime bi se stvorili uslovi za egzistenciju povratnika i otklonila bi se minska opasnost po lokalno stanovništvo.

PROJECT DESCRIPTIION

1. SOCIOECONOMIC IMPACT:

Subject location is mostly agricultural area owned by returnees from village Makotici and partially state area overgrown by pinewood. It is 120 meters away from the nearest houses in village Makotici. In the pre-war period the area was used as pasture for cattle, for cutting firewood, collecting mushrooms and hunting. The area is not used due to the mine risk but returnees cut wood, breed cattle, use agricultural land, hunt and by doing these activities put themselves in danger. Technical survey of subject location would reduce suspected area, the area would be put in use again which would create conditions for existence of returnees and eliminate daily mine risk for the returnees in village Makotici.
