OBRAZLOZENJE PROJEKTA

1. SOCIOEKONOMSKI UTICAJ

Predmetna površina je po naravi selo i poljoprivredno zemljište u privatnom vlasništvu, koje je zbog nekorištenosti zaraslo u gusto rastinje. Na površini se nalazi jedna, a neposredno do nje i više devastiranih kuća koje se zbog minske opasnosti ne obnavljaju. Zbog urađenog puta kroz rizičnu površinu, sada se rizična površina sastoji iz dvije površine RP 1 i RP 2. U prijeratnom periodu stanovništvo se uglavnom bavilo stočarstvom i poljoprivredom, a predmetnu lokaciju koristilo za stanovanje, poljoprivredne radove i ispašu stoke. Zbog minske opasnosti zemljište se ne koristi ni u kakve svrhe. Neposredno okruženje koriste povratnici za ispašu stoke i sječu ogrevnog drveta koji se svojim aktivnostima dovode u opasnost od mina. Čišćenjem lokacije redukovala bi se sumnjiva površina, zemljište privelo namjeni, čime bi se stvorili uslovi za egzistenciju povratnika i otklonila bi se opasnost po lokalno stanovništvo.

Broj neposredno ugroženih osoba i povremenih korisnika:	10

PROJECT DESCRIPTION

1. SOCIOECONOMIC IMPACT:

The subject area is by nature a village and privately owned agricultural land, which is overgrown with dense greenery due to disuse. On the very location there is one, and several more devastated houses are located in its immediate vicinity, none of which are being reconstructed due to threat of mines. Because a road had been built through the subject area, it now consists of two areas, RP 1 and RP 2. Before the war, the population had mostly been engaged in livestock farming and agriculture, and used the subject location for such purposes. Due to threat of mines the land is currently not being used at all. The adjacent areas are used by returnees as pastures for their cattle and for cutting firewood, what exposes them to the danger of mines. Mine clearance of this location would reduce the suspect area, allow use of land for its original purpose, thus providing conditions for returnees to earn their living and removing threat to local population.
