# OBRAZLOZENJE PROJEKTA

## 1. SOCIOEKONOMSKI UTICAJ

Rizična površina je kolski put Savići - Zaseok koji se ne koristi i zarastao je u gusto rastinje. Od najbližih kuća u selu Savići udaljena je oko 220 metara. U prijeratnom periodu stanovništvo se uglavnom bavilo stočarstvom i poljoprivredom, a put su koristili za odlazak do svojih parcela i komunikaciju sa drugim selima. Zbog minske opasnosti put se ne koristi ni u kakve svrhe. Neposredno okruženje koriste mještani sela Zaseok i Savići za ispašu stoke i poljoprivredne rade, te se svojim aktivnostima dovode u opasnost od mina. Čišćenjem bi se eleminisala rizična površina i omogućilo bi se privođenje zemljišta namjeni, cime bi se stvorili ekonomski uslovi za egzistenciju povratnika i otklonila bi se svakodnevna minska opasnost po lokalno stanovništvo.

# PROJECT DESCRIPTIION

## 1. SOCIOECONOMIC IMPACT:

The risk area is the unpaved road Saviæi-Zaseok, which is currently disused and has been overgrown with dense greenery. The location is around 220 m from the nearest houses in the village of Savici. Before the war, local population was mostly engaged in livestock farming and agriculture, and they used the road to get to their parcels or to other villages. Due to risk of mines the road is currently not being used for any purpose. Immediate surrounding area is used by people of villages Zaseok and Savici as pasture for cattle and for agriculture, which exposes them to threat of mines. Mine clearance would eliminate this risk area and enable the use of land for its original purpose, thereby creating economic conditions for returnees to earn income and alleviate the daily threat of mines to the local population.

Number of directly impacted persons and occasional users: **10**

Number of users after project implementation: **15**

## 2. PRIORITISATION:

### THREAT LEVEL

**H - HIGH**

Area was between confrontation lines; area is disused; there are minefield records and/or participant or witness of mining and visible traces of possible mine risk

### LEVEL OF USE: I

#### CRITERIA

**H.1.2 - INFRASTRUCTURE**

Demining for the reasons of rehabilitation and reconstruction of infrastructural facilities: roads, electricity networks, water pipelines, gas and telephone installations with accompanying facilities
