OBRAZLOZENJE PROJEKTA

1. SOCIOEKONOMSKI UTICAJ

Predmetna povr{ina je ve}im dijelom bukova i hrastova {uma u privatnom vlasni{tvu, dok je manji dio poljoprivredno zemlji{te, koje je zbog nekori{tenosti zaraslo u gusto rastinje. Od najbli`ih ku}a u selu Bakra-i udaljena je oko 490 metara. U prijeratnom periodu stanovni{two se uglavnom bavilo sto-arstvom i poljoprivredom, a predmetnu lokaciju koristilo za sje-u ogrevnog drveta i ispa{u stoke. Zbog minske opasnosti zemlji{te se ne koristi ni u kakve svrhe. Neposredno okru`enje koriste povratnici za ispa{u stoke i sje-u ogrevnog drveta koji se svojim aktivnostima dovode u opasnost od mina. Tehni~kim izvi|anjem lokacije redukovala bi se sumnjiva povr{ina, zemlji{te privelo namjeni, ~ime bi se stvorili uslovi za egzistenciju povratnika i otklonila bi se opasnost po stanovni{two.

PROJECT DESCRIPTON

1. SOCIOECONOMIC IMPACT:

Subject location is mostly beech and oak forest privately owned while small part of the area is agricultural land which is overgrown in dense vegetation. It is 490 meters away from the nearest houses of village Bakra. In the pre-war period the population was engaged in cattle breeding and agriculture but subject location was used for firewood cutting and cattle breeding. Due to mine risk the area is not used in any purpose. Immediate vicinity of the area is used by returnees for cattle breeding and firewood cutting and by doing these activities they lead themselves in danger. Technical survey of location would reduce suspected area, land will be put in use again which would create conditions for existence of returnees and remove daily mine threat.

Number of directly impacted persons and occasional users: **10**

Number of users after project implementation: **15**

2. PRIORITISATION:
