OBRAZLOZENJE PROJEKTA

1. SOCIOEKONOMSKI UTICAJ

Predmetna površina je u privatnom vlasništvu, manjim dijelom obrasla ekonomskom bukovom šumom dok je većim dijelom poljoprivredno zemljište koje je zbog dugogodišnje nekorištenosti zaraslo u travu, pojedinačno drveće i gusto rastinje. Udaljena je od najbližih kuća sela Glodi oko 30 metara. U prijeratnom periodu stanovništvo se uglavnom bavilo stočarstvom i poljoprivredom, a predmetnu lokaciju koristilo za poljoprivredne radove i ispašu stoke. Zbog minske opasnosti zemljište se ne koristi ni u kakve svrhe. Neposredno okruženje koriste povratnici za ispašu stoke i sječu ogrevnog drveta i takođe nastoje proširiti obradivu površinu te se svojim aktivnostima dovode u opasnost od mina. Čišćenjem lokacije eliminisala bi se rizična površina i omogućilo privođenje zemljišta namjeni čime bi se stvorili ekonomski uslovi za egzistenciju povratnika i otklonila bi se opasnost po lokalno stanovništvo.

Broj neposredno ugroženih osoba i povremenih korisnika: **15**
Broj korisnika nakon realizacije projekta: **20**

PROJECT DESCRIPTIION

1. SOCIOECONOMIC IMPACT:

The subject area is privately owned, in a smaller part covered by commercial beech forest, while in the larger part it is arable land now overgrown with grass, solitary trees and dense greenery due to many years of disuse. It is around 30 meters from the nearest houses in the village of Glodi. Before the war, the population was mostly engaged in livestock farming and agriculture, and the subject location had been used for agriculture and as pasture. Due to threat of mines the land is currently not being used at all. The adjacent area is used by returnees as pasture for their cattle and for cutting firewood, and people are also attempting to extend their arable areas thus exposing themselves to the threat of mines. Mine clearance of this location would eliminate this risk area and allow the use of land for its original purpose, thereby creating economic conditions for returnees to earn their living and removing the threat to the local population.

Number of directly impacted persons and occasional users: **15**

Number of users after project implementation: **20**

2. PRIORITISATION:

THREAT LEVEL

H - HIGH

There are indications of PROM mines on the location. Indications mean that are for location available data on mine incidents/accidents, minefield records or reliable witnesses

LEVEL OF USE: I

CRITERIA

**H.1.4 - ECONOMIC
RESOURCES**

Demining of agricultural land, parts of forests with firewood and other natural resources necessary for the livelihood of local population in impacted communities
